

# Medicine Support for Children with Cancer and their Parents

Prepared by

Tesfa Addis Parents Childhood Cancer Organization (TAPCCO)

Addis Ababa

March 2023

## Background

Tesfa Addis Parents Childhood Cancer Organization (TAPCCO) is a Non-profit Organization (NPO) with local administration office started by parents of children with cancer and individuals interested in helping children with cancer and their families. TAPCCO seeks to support all children with cancer during treatment and throughout follow-up and their families in Tikur Anbessa Specialized Hospital (TASH), Jimma University Hospital, Gondar University Hospital and Ayder Specialized Hospital and work closely to maintain and improve the facilities of the hospitals. Activities include: organizing support groups and counseling, psychosocial support for children and parents or guardians; provide nutritional supplements, funding for transport, assist parent to buy chemotherapy drugs as needed, provide lodging for parents in-between treatments, provision of clothes, provide schooling or educational material for the children in the wards, bereavement support, organize recreational programs and assist the pediatric hematology/oncology unit in the hospitals to upgrade service.

Cancer medicine and related supportive medicine are key to the treatment and good outcome of children with cancer. In Ethiopia on average around 6,000 -10,000 children is estimated to get cancer each year. We have five government hospitals in the country that specialized in treating children with cancer. These are Tikur Anbessa Specialized Hospital, St. Paul Millennium Hospital, Jimma University Hospital, Ayder Specialized Hospital (Mekele) and Gondar University Hospital. Total numbers of children that reach these hospitals are estimated to be 1,000 - 2,000 per year. To effectively treat children with cancer timely availability of medicine, affordable and quality medicine is the core for the cure from childhood cancer. Cancer medicine however, is very expensive all over the world. In case of Ethiopia despite the government effort in availing affordable cancer medicine often there is sever cancer medicine and supportive drugs. Currently due to nationwide shortage of medicine, the children with cancer in treatment are facing a lot of challenges in accessing most essential medicines, antibiotics, antifungal, accessories such as syringes, gloves, alcohol, bandage and the list go on. TAPCCO support around 600 children with cancer in treatment and we often buy medicine not found in the hospital from private pharmacies. The medicines sold in the private pharmacy are very expensive and at the moment since most medicine are not available our expense has increased by 67% and it is expected to increase more.

Responding to these needs Yemi Foundation in the USA has given TAPCCO to assist children in Gondar and Jimma that are undergoing treatment in the two hospitals. Total fund of 10,000 USD (Birr 529,325) was received from the foundation on October 2023. Following the receipt of the fund TAPCCO was able to buy medicine worth of USD 6, 656 (Birr 359,435) starting from October 2023- February 2023 for 117 children.

The support has enabled many children and families to stay in treatment and complete treatment. These means if in the future some complication do not arise the children has a chance for survival.

The following pages shows the list of children that got support and detailed amount of support in both locations, Gondar University Hospital and Jimma University Hospital Pediatric Oncology Wards,

## Gondar University Hospital Pediatric Oncology Ward

TAPCCO started working with Gondar University Hospital Pediatric Oncology ward in the year 2020. It started working after signing MOU with the university and project agreement with the regional finance and economic office and health bureau. The main agreement that we signed is to give psychosocial support to the ward and the children that undergo treatment. Currently, it gives support in form of accommodation, nutrition, transportation, counseling support, and medicine support and infection control. In Gondar TAPCCO has team of 12 staff working in various aspects, it has one accommodation center where patients and families can stay during follow-up of treatment as an outpatient. The home especially serves patients and families that come outside Gondar city. It has capacity of 20 families in a day at a time, here food, cleaning material and psychological support is provided by TAPCCO for free. In Gondar there are estimated number of 200 active patients following treatment at this time.

One of the challenges have been medicine shortage and inability of families to buy medicine required for their children treatment. Due to these many had abandoned treatment simply because they could not afford medicine or the invalidity of their health insurance scheme with the hospital. It is estimated that over 50% of the patients faced this problem and thus had to abandoned treatment.

The support obtained from Yemi foundation regarding medicine had helped us to reduce the rate of treatment abandonment immensely, we can say we have reduced the abandonment from 30-40% if not totally eliminate it as other factor also has role in abandonment. We were able to buy medicine for 52 patients that needed the support. Others were able to access medicine using their health insurance accepted by the hospital. The 52 are patients that has health insurance that are not accepted by the hospital due to technical issues. Total of USD 2,077 (Birr 112,155) were spent for medicine purchase for Gondar program. (See Table 1 for detail)

Table 1: Gondar Medicine Purchase October 2023-February 2024

## Jimma University Hospital Pediatric Oncology Ward

TAPCCO started working with Jimma University Hospital Pediatric Oncology ward on January 2018. It started working after signing MOU with the university and project agreement with the regional finance and economic office and health bureau. The main agreement that we signed is to give psychosocial support to the ward and the children that undergo treatment. Currently, it gives support in form of accommodation, nutrition, transportation, counseling support, and medicine support and infection control. In Jimma TAPCCO has team of 12 staff working in various aspects, it has one accommodation center where patients and families can stay during follow-up of treatment as an outpatient. The home especially serves patients and families that come outside Gondar city. It has capacity of 40 families in a day at a time, here food, cleaning material and psychological support is provided by TAPCCO for free. In Jimma there are estimated patients of 600 in active treatment currently.

One of the challenges have been medicine shortage and inability of families to buy medicine required for their children treatment. Due to these many had abandoned treatment simply because they could not afford medicine. It is estimated that around 40% of the patients faced this problem and thus had to abandoned treatment.

The support obtained from Yemi foundation regarding medicine had helped us to reduce the rate of treatment abandonment immensely, we can say we have reduced the abandonment from 30-40% if not totally eliminate it, as other factor also has role in treatment abandonment. TAPCCO has spent total USD 4,579.26 (Birr 257,280) for Jimma since October 2023 to February 2024 received from Yemi Foundation (see Table 2, for details).

**Table 2: Jimma Medicine purchase October 2023-February 2024**
